CPS216: Advanced Database Systems (Data-intensive Computing Systems)

Introduction to MapReduce and Hadoop

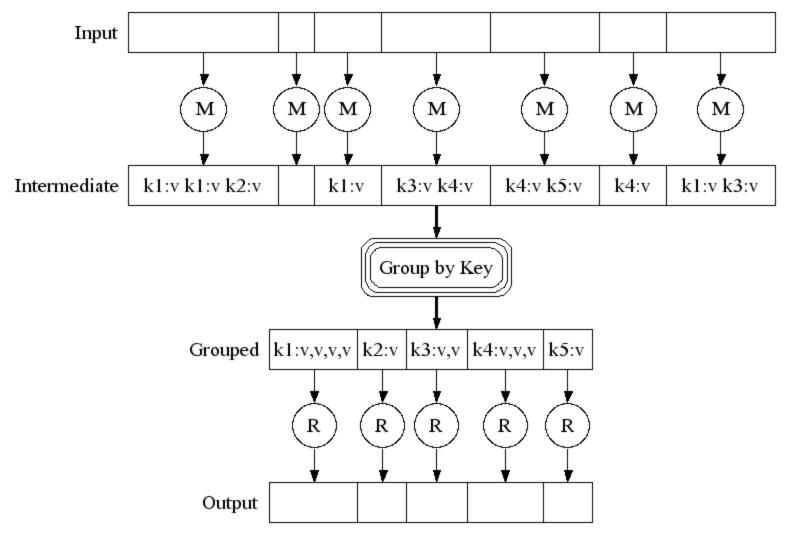

Shivnath Babu

Word Count over a Given Set of Web Pages

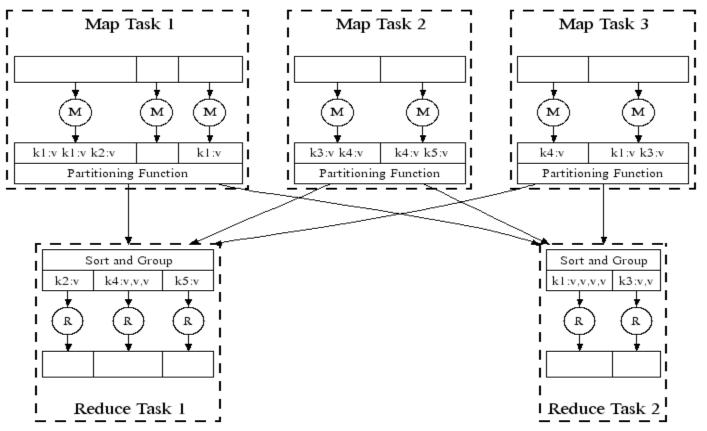

Can we do word count in parallel?

The MapReduce Framework (pioneered by Google)

Automatic Parallel Execution in MapReduce (Google)

Handles failures automatically, e.g., restarts tasks if a node fails; runs multiples copies of the same task to avoid a slow task slowing down the whole job

MapReduce in Hadoop (1)

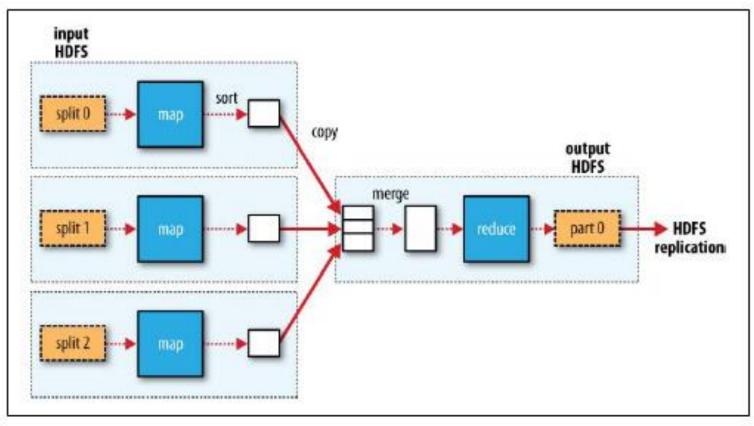

Figure 2-2. MapReduce data flow with a single reduce task

MapReduce in Hadoop (2)

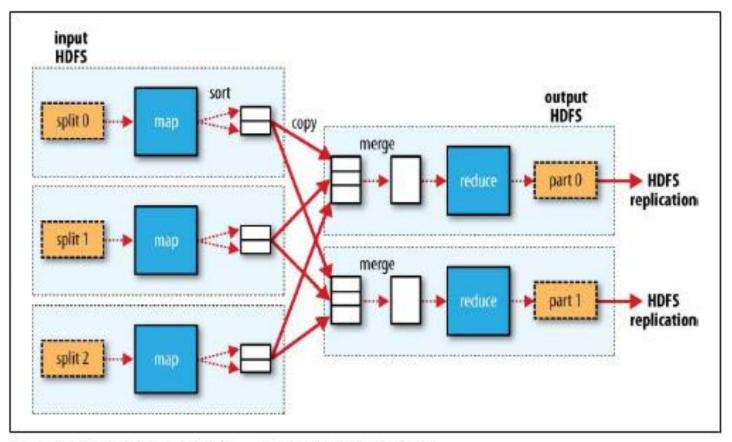

Figure 2-3. MapReduce data flow with multiple reduce tasks

MapReduce in Hadoop (3)

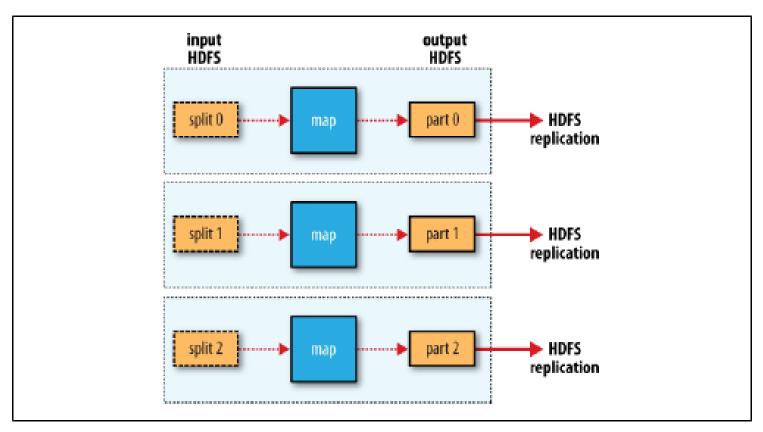

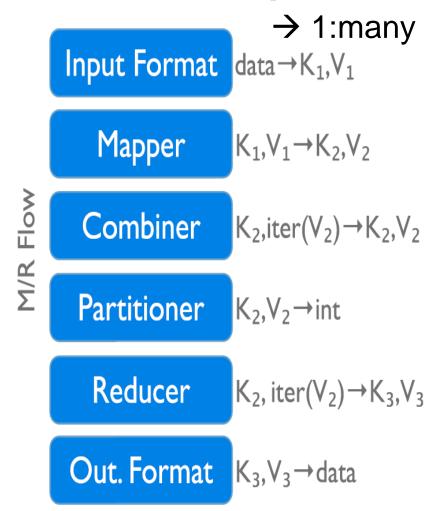

Figure 2-4. MapReduce data flow with no reduce tasks

Data Flow in a MapReduce Program in Hadoop

- InputFormat
- Map function
- Partitioner
- Sorting & Merging
- Combiner
- Shuffling
- Merging
- Reduce function
- OutputFormat

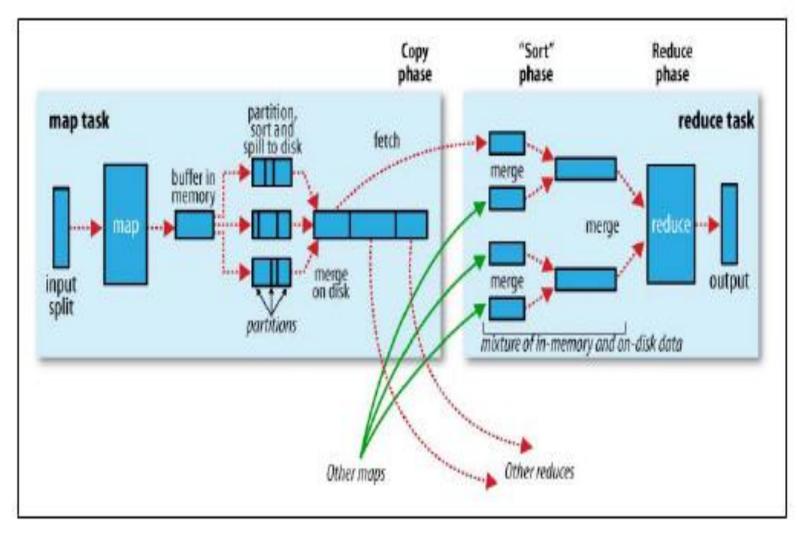

Figure 6-4. Shuffle and sort in MapReduce

Lifecycle of a MapReduce Job
