CompSci 6
Introduction to Computer Science

October 25, 2011

Prof. Rodger

Announcements

- No reading or RQ for next time
- Apt-three due Thursday

- Today
  - More on apts
  - More on parameters

Passing parameters to functions

- Parameter: in definition
- Argument: in use
- Questions:
  - What if the name of the parameter is same as the name of the argument?
  - What happens to a variable when it is sent to a function? After the call to the function?

Mutable/immutable

- Mutable
  - Lists, sets
- Immutable
  - Numbers, strings, tuples

- What happens to mutable and immutable objects when you pass them as arguments?
- How does one change the value of a number/string/tuple by using a function?
- Classwork!
