PFThursday

- Review Organization and Problem-Solving
 - ▶ Defining functions, calling functions
 - > Return types, print, None
- Incremental construction as design pattern
 - ▶ Build programs: start small, add with confidence
 - ▶ Build new strings: append/concatenate values
 - Build lists (later, but similar to strings)

Compsci 101.2, Fall 2015

6.1

APT Pancake: http://bit.ly/pancakes101

- How do you solve this problem?
 - ▶ If you have confidence you can solve for any size pan, then start programming
 - ▶ If you can't do it by hand ...
 - Get some credit for APT, some dancing!

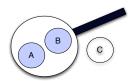

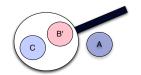

- Sometimes APTs have hard algorithms
 - > Translating to code not so bad
- Sometimes APTs have easy algorthms
 - > Translating to code is difficult

Compsci 101.2, Fall 2015 6.2

Three pancakes in a two-cake pan...

- the system
 - > First 5 minutes
- Number of cakes in
 Number of cakes in the system
 - > Second 5 minutes

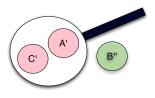

Compsci 101.2, Fall 2015

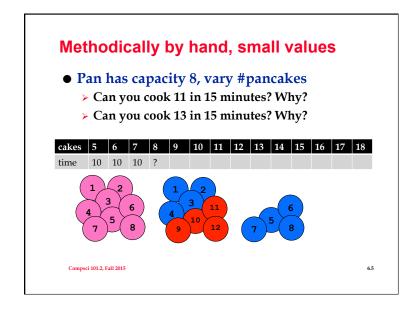

Three pancakes in a two-cake pan...

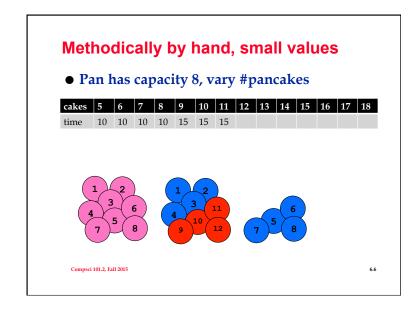

- Number of cakes in How many minutes the system
 - ➤ Third 5 minutes
- to cook all three pancakes?

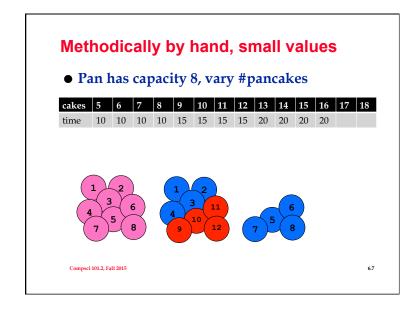

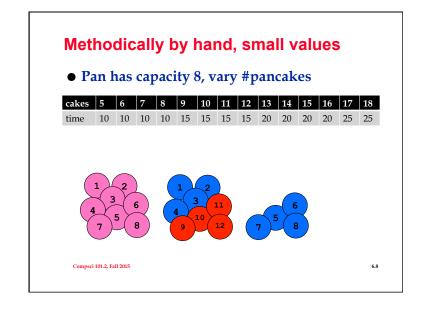

Compsci 101.2, Fall 2015

Pancake Algorithm

- If you have pan of size 17 and 34 pancakes
- If you have pan of size 17 and 43 pancakes
- Pan fits 100 pancakes, but you have 452
- Pan fits N pancakes, but you have P
 - ▶ if P <= N then time needed is ...
 - \rightarrow X = P/N, what does this mean for time?
 - \rightarrow Y = P % N, what does this mean for time?

Compsci 101.2, Fall 2015

6.9

Eclipse Interlude

- Finishing the Pancake problem
 - > Translating problem-solving ideas to code
 - > Control with if/elif: arithmetic with / and %

Compsci 101.2, Fall 2015 6.10

Algorithmic Problem/Program Testing

• Complete this form for two more APTs

http://bit.ly/101fall15-0910-1

Compsci 101.2, Fall 2015

6.11

How to teach pancake flipping

- http://www.youtube.com/watch?v=W_gxLKSsSIE
 - ➤ Is this computer science? http://bit.ly/zykOrh
 - > For longer, more complex robotic tasks
 - http://www.youtube.com/watch?v=4usoE981e7I
- Do robots matter?
 - > Do they dream?
 - Self-driving cars?
 - ➤ Machine learning?

Compsci 101.2, Fall 2015

6.1

Three versions of is_vowel

```
def is_vowel(ch):
    if ch =='e':
        return True
    if ch == 'a':
        return True
    if ch == 'i':
        return True
    if ch == 'o':
        return True
    if ch == 'u':
        return True
    return True
    return True
```

```
def is_vowel(ch):
    c = "aeiou".count(ch)
    if c > 0:
        return True
    else:
        return False
```

```
def is_vowel(ch):
    return "aeiou".count(ch) > 0
```

Compsci 101.2, Fall 2015

6.13

Python if statements and Booleans

- In python we have if: else: elif:
 - > Used to guard or select block of code
 - > If guard is True then, else other

- What type of expression used in if/elif tests?
 - > ==, <=, <, >, >=, !=, and, or, not, in
 - > Value of expression must be either True or False
 - > Type == bool, George Boole, Boolean,
- Examples with if
 - String starts with vowel (useful for APT Emphasize)

Compsci 101.2, Fall 2015 6.14

Eclipse Interlude

- Finishing Emphasize
 - > Identifying vowels
 - **▶** Helper functions
 - Slicing strings

Compsci 101.2, Fall 2015

6.15

Software Dreams

- Translating ideas into (Python) code
 - > Create interesting "heads", "totem poles"?
 - > Create software for face recognition? Gait?
 - Create "five four" from "four five"?
 - Create "SCUBA" from "self contained underwater breathing apparatus"
- Master the syntax of the language?
 - > Organization of program constructs
 - > Knowledge of libraries
 - > Practice and experience!

Compsci 101.2, Fall 2015

6.16

Building Totem in stages/incrementally

- What functions do not return values?
 - > They print strings returned by other functions
- For totem and randompole, which one first?
 - > Don't do both at same time, grow the program
- Start simple
 - ➤ Next?
 - > Add?
 - Questions?

```
def hair_part():
    return "xxyyzz"
def eye_crossed():
    return "123456"
def totem():
    print hair_part()
    print eye_crossed()
```

Compsci 101.2, Fall 2015

6.17

Anatomy of a Python String

- String is a sequence of characters
 - Functions we can apply to sequences: len, slice [:], others
 - > Methods applied to strings [specific to strings]
 - st.split(), st.startswith(), st.strip(), st.lower(), ...
 - st.find(), st.count()
- Strings are *immutable* sequences
 - Characters are actually length-one strings
 - > Cannot change a string, can only create new one
 - What does upper do?
 - > See resources for functions/methods on strings
- Iterable: Can loop over it, Indexable: can slice it

Compsci 101.2, Fall 2015

Lynn Conway

See Wikipedia and lynnconway.com

- Joined Xerox Parc in 1973
- Revolutionized VLSI design with Carver Mead
- Joined U. Michigan 1985
- Professor and Dean, retired '98
- NAE '89, IEEE Pioneer '09
- Helped invent dynamic scheduling early '60s IBM
- Transgender, fired in '68

Compsci 101.2, Fall 2015

Incremental + : numbers and strings

- Wtht vwls cn y stll rd ths sntnce?
 - > Create a no-vowel version of word
 - > Examine each character, if it's not a vowel ...
 - > Pattern of building a string

```
def noVowels(word):
    ret = ""
    for ch in word:
        if not is_vowel(ch):
            ret = ret + ch
    return ret
```

Compsci 101.2, Fall 2015

6.20

6.18

Counting vowels in a string

• Accumulating a count in an int is similar to accumulating characters in a string

```
def vowelCount(word):
    value = 0
    for ch in word:
        if is_vowel(ch):
        value = value + 1
    return value
```

• Alternative version of adding: value += 1

Compsci 101.2, Fall 2015

6.21

Bug and Debug

- software 'bug'
- Start small
 - **Easier to cope**
- Judicious 'print'
 - > Debugger too

- Verify the approach being taken, test small, test frequently
 - > How do you 'prove' your code works?

Compsci 101.2, Fall 2015

6.23

From high- to low-level Python

```
1 ('')
                              0 LOAD CONST
def reverse(s):
                              3 STORE FAST
                                            1 (r)
  r = ""
                             6 SETUP LOOP
                                            24 (to 33)
   for ch in s:
                             9 LOAD FAST
                             12 GET ITER
      r = ch + r
                          >> 13 FOR ITER
                                            16 (to 32)
                             16 STORE FAST
                                            2 (ch)
   return r
                             19 LOAD FAST
