

Lindsay Sapienza

Assignment 9

I never thought seeing green  
Could cause me to make such a scene.  
Staring at my screen for hours  
Seeing green made me feel like I had magical powers

I must attribute all my success,  
To the great Susan Rodger, I must profess.  
She taught us so much,  
But could never quite get the boys sitting in the back to hush

All of those Lecture Read-Me's  
And so many APT's  
I learned so much about computer science  
Coding became as common as a kitchen appliance

And although this course has come to an end  
I know the lessons I learned will transcend  
They might not help me at Shooters, Frat parties, or Devine's  
But I know in CompSci 201, they will come in handy some time!
