I hit submit
Internet goes out
Dukeblue won't do the trick
Switch to DukeOpen, and click the magic button: test
My screen goes blank and all I can see is: Green!
I quickly scroll down and find some red lurking telling me to stop in my tracks
23/24 with one runtime exception
My code has faltered
Back to the drawing board I go
I used the wrong variable for my final elif statement
This time I will have all green, I know
Find my .py file
Click test
Wow! All green as I do a mini fist pump in the treacherous quiet spaces of 4th floor Perkins
This APT is done!
Onto the next one.
