

[illegible]

Prof. Rodger

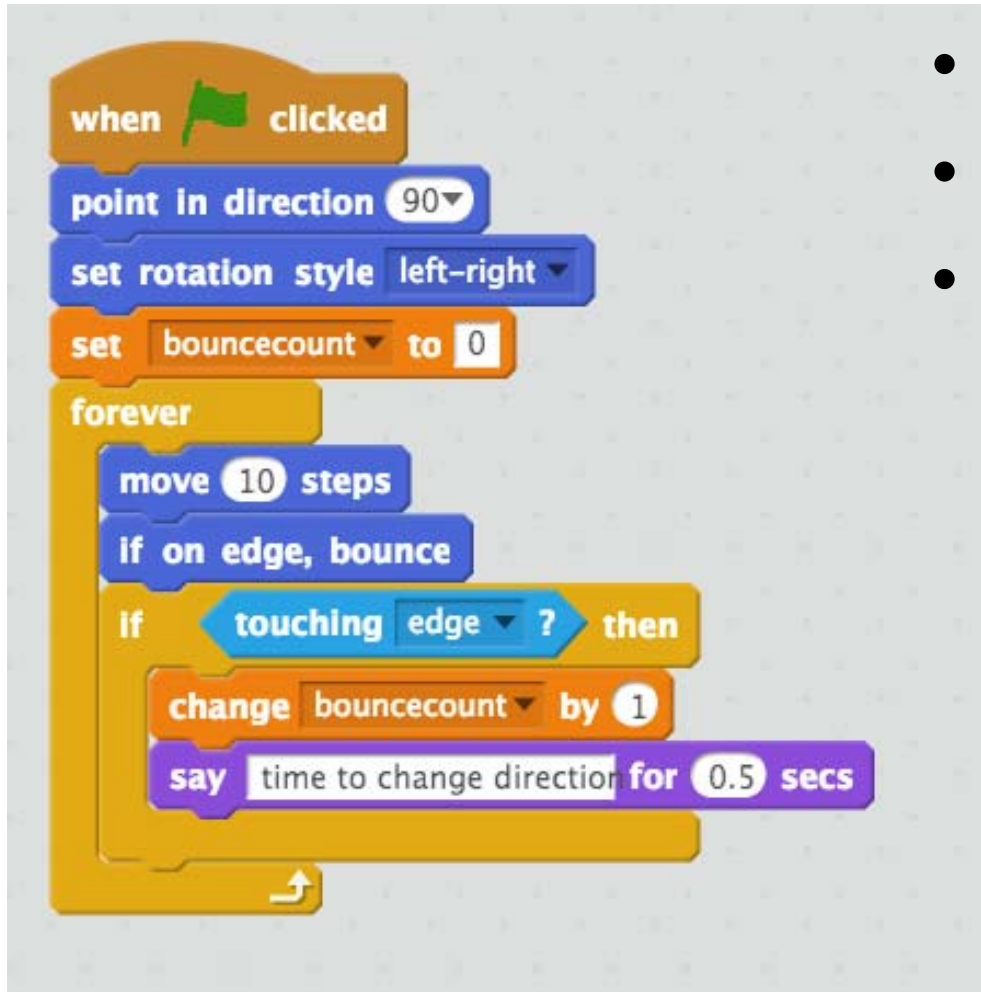

Announcements

- Reading for next time on calendar page
 - RQ 2 due Thursday
- Assignment 1 due Tuesday
 - Have fun with Blockly
- Install your environment! Get Help!
- Lab 1 this week!

- Plan for Today:
 - Problem Solving and Python

Software Failure

Review Scratch program

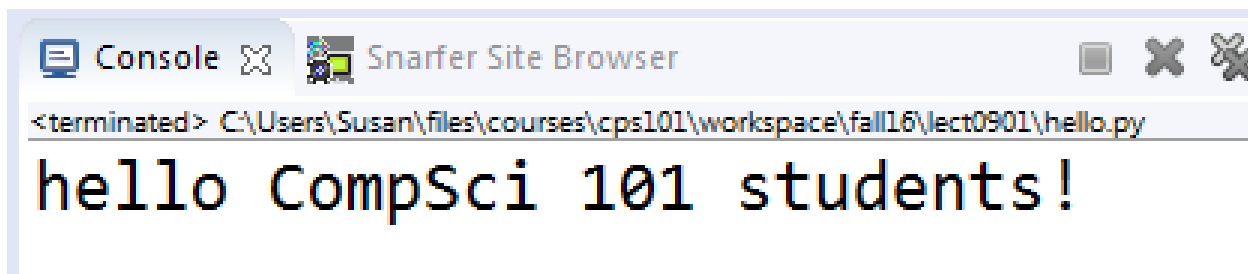

- "Hello World"
- Scratch Program
- Colors
 - Duke blue: motion
 - Mustard: control
 - Light blue: sensing
 - Orange: data
 - Purple: looks

Python code: hello.py

```
1 '''  
2 Created on Aug 31, 2016  
3  
4 @author: Susan  
5 '''  
6 print "hello CompSci 101 students!"
```

Run hello.py

```
1 '''  
2 Created on Aug 31, 2016  
3  
4 @author: Susan  
5 '''  
6 print "hello CompSci 101 students!"
```

The screenshot shows a console window titled "Console" with a "Snarfer Site Browser" icon. The command prompt shows the execution of a Python script: `<terminated> C:\Users\Susan\files\courses\cps101\workspace\fall16\lect0901\hello.py`. The output of the script is displayed as `hello CompSci 101 students!`.

Python data reading code

```
f = open("kjbv10.txt")
st = f.read()
total = len(st)
zc = st.count('z')
print "total # chars = ", total
print "number of z's", zc
for ch in 'aeiou':
    print ch, st.count(ch)
```

Explaining Python code?

Duke Connection: Fred Brooks

'53

- What Would FB Say?

"The most important single decision I ever made was to change the IBM 360 series from a 6-bit byte to an 8-bit byte, thereby enabling the use of lowercase letters. That change propagated everywhere."

- "Fred Brooks" by Copyright owned by SD&M (www.sdm.de) - Request for picture sent by email to Fred Brooks by uploader (Mark Pellegrini; user:Raul654) Fred sent this photo back, along with contact information for Carola Lauber at SD&M, who gave copyright permission.. Why is programming fun?

Fred Brooks

- First is the sheer joy of making things
- Second is the pleasure of making things that are useful
- Third is the fascination of fashioning complex puzzle-like objects of interlocking moving parts
- Fourth is the joy of always learning
- Finally, there is the delight of working in such a tractable medium. The programmer, like the poet, works only slightly removed from pure thought-stuff.

Lab 1 This Week

- Install Before attending if can
- Modify Python program
- Scratch program

Our Programming Environment

- Install 5 items

- Why Java? – not using

- Eclipse – platform for development

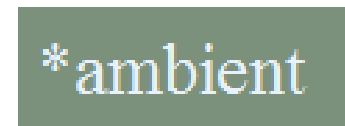

- Python – programming language
 - Pydev – Python IDE for Eclipse

- Canopy – python libraries

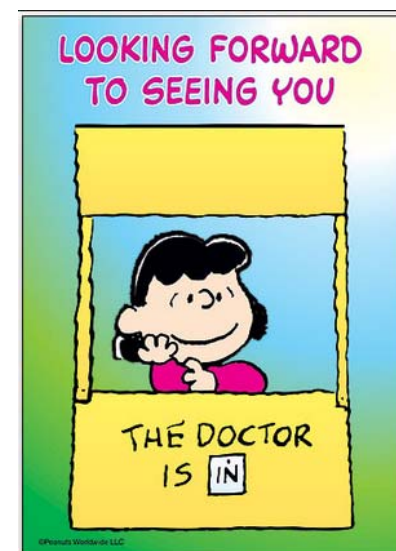

- Ambient – turnin/snarf files to/from Duke

How does one get help in CompSci 101?

- Consulting hours
 - Sunday-Thursday 7:30-11:30pm
- Office hours (prof, TAs)
- Collaborate with other students
- Piazza
 - Ask questions
 - Do not post your code and ask what is wrong!
 - Post error message and line of code for error message
 - If added class late, may need to add yourself

How to succeed in Compsci 101

- Start assignments early, they'll take longer than you think
- Read the book, we'll build on it in class
- Collaborate well, but be sure you can do work on your own!
- Be curious, work hard at beginning, think carefully

Your goal is to ...

- Get all assignments completed and turned in on time.

AND...

Algorithm

- Recipe
- Sequence of steps that constitute instructions
- Step-by-step procedure for calculations

What does Nate Silver do?

<http://53eig.ht/1tZy909>

How do Netflix and Amazon know me?

- Compsci101 project: capable of implementation as a program, but much more basic

Google “algorithm”

The image is a screenshot of a Google search results page for the query "algorithm". The Google logo is in the top left, and the search bar contains the word "algorithm" with a magnifying glass icon to its right. Below the search bar, navigation tabs for "All", "News", "Images", "Books", "Videos", "More", and "Search tools" are visible, with "News" being the selected tab. The search results indicate "About 1,100,000 results (0.34 seconds)".

The first result is from News-Medical.net, dated 22 hours ago, with the headline "Simple diagnostic **algorithm** to assess pulmonary embolism risk can ...". The snippet reads: "Now, new findings presented at ESC Congress 2016, suggest a simple diagnostic **algorithm** can be used to rule out PE in a significant number ...".

The second result is from the Daily Mail, dated Aug 30, 2016, with the headline "AI **Algorithm** chooses most attractive selfies from 6000 submissions". The snippet reads: "AI beauty contest used five **algorithms** to evaluate youthfulness, face symmetry, skin and other parameters, and then compare them to models ...". To the left of the text is a small grid of four selfie images.

The third result is from Bitcoin Magazine, dated Aug 29, 2016, with the headline "New **Algorithm** Manages Bitcoin Price Volatility for Everyday Users". The snippet reads: "The newly launched **algorithm** for Bitcoin trading, TWAP (Time Weighted Average Price), could save both money and headaches for people ...". Below this is another headline from Live Bitcoin News, dated Aug 30, 2016: "TWAP Bitcoin **Algorithm** Makes Trading Easier During Volatile Periods". To the left of the text is a small image of a roller coaster.

The fourth result is from the Wall Street Journal, dated 11 hours ago, with the headline "An **Algorithm** to Predict a Bestseller". The snippet reads: "20, have detected through an **algorithm** they designed to identify the DNA of bestselling novels. For the last five years, Matthew L. Jockers, ...". To the left of the text is a small image of a man and a woman standing together.
