```
if __name__ == '__main__':

    print "Compsci 101: " + "A Shakespearean Sonnet"

    ''
    Oh, what a time in compsci 101 -
    Recursions, for loops, and tuples, oh my!
    Now that the class is essentially done,
    One may ask me: I might take it, should I?

    Now that I think, I did spend a few hours
    Trying to get all my APTs green.
    And some assignments just plain made me sour
    Just when I thought, 'success'! Twas, not - red screen

    I forgot a colon? Oh, goodness sake!
    And sometimes it was a wrong space – just one!
    But despite the frustration, you should take -
    I truthfully found the coding quite fun.

    Now that it's done, I will miss it, Alas.
    I look forward to my next compsci class!
