

Sarah  
COMPSCI 101 Final Assignment

As a neuro major I never thought,  
I'd have to learn to talk like a robot.  
But lo and behold a sneaky co-req,  
Would oft make me say, "What the heck?!"

I learned the basics over the summer,  
Hoping this class wouldn't be such a bummer,  
And while the code came easy to me at first,  
Later in this semester, this class would be the worst.

As the APT's turned redder,  
I tried so hard to do better.  
Hours and hours and hours and hours,  
But still I needed magical powers!

With 3 other difficult classes,  
I prayed for 4 passes,  
As I knew that my own abilities,  
Were crowd by my imbecility.

But YAY! I have made it to here,  
Despite my trepidation and fear,  
I completed all my work! ON TIME!  
And now all I have left is this lame rhyme!
