Looping – exact number of times

Count loop

3

```
do in order
 (this.bunny) | turnToFace (this.panda) |
                                            add detail
count up to 🗐
     (this.bunny) walk
  loop-
```

• How many steps to get to the panda?

10/1/20 3, 6, 8?

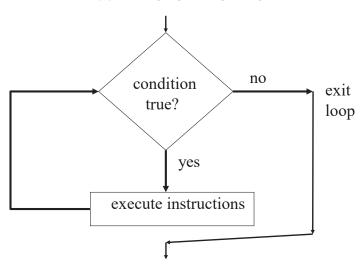

CompSci 94 Fall 2020

Repetition

- Sometimes don't know exactly how many times a set of instructions are repeated.
- Stopping is based on a condition
- Example:
 - Game of Chess, how many moves until win
 - Stop: when markers are in check mate position
- Indefinite Repetition
 - Where number of repetitions not known in advance
 - Use **while** statement

10/1/20 CompSci 94 Fall 2020

While statement

• While some condition is true

turnToFace this.panda add detail

10/1/2€xecute instructions

do in order

CompSci 94 Fall 2020

5

General "Rule of Thumb"

- As a general rule, a While loop should be written so the loop will eventually end
 - Requires statements inside the loop change the conditions of the world such that condition for While eventually becomes false
- If While loop never ends
 - Infinite while loop

10/1/20 CompSci 94 Fall 2020

Compare – What is difference?
