Back to Alice 3....

## Looping – exact number of times

- Count loop

```
do in order
  this.bunny turnToFace this.panda add detail
  count up to 3
  loop
    this.bunny walk
```

- How many steps to get to the panda?

10/14/21 3, 6, 8?

# Repetition

- Sometimes don't know exactly how many times a set of instructions are repeated.
- Stopping is based on a condition
- Example:
  - Game of Chess, how many moves until win
  - Stop: when markers are in check mate position
- Indefinite Repetition
  - Where number of repetitions not known in advance
  - Use **while** statement

# While statement

- While some condition is true
  - execute instructions

# General “Rule of Thumb”

- As a general rule, a While loop should be written so the loop will eventually end
  - Requires statements inside the loop change the conditions of the world such that condition for While eventually becomes false
- If While loop never ends
  - Infinite while loop

# Q1 Compare – What is difference?

## Q1 Compare – What is difference?

```
do in order
  this.bunny turnToFace this.panda add detail
  count up to 3
  this.bunny walk
loop
```

```
do in order
  this.bunny turnToFace this.panda add detail
  while this.bunny getDistanceTo this.panda - this.panda getWidth > 1.0 is true
  this.bunny walk
loop
```

- While loop stops when bunny is close to panda
- Count loop bunny just walks three times

## Q2. What happens when run?

```
while this.falcon isAbove this.ground add detail is true
  this.falcon move DOWN, 0.25 add detail
loop
```

```
while this.pig isAbove this.ground add detail is true
  this.pig move DOWN, 0.25 add detail
loop
```

## Q2. What happens when run?

```
while this.falcon isAbove this.ground add detail is true
  this.falcon move DOWN, 0.25 add detail
loop
```

```
while this.pig isAbove this.ground add detail is true
  this.pig move DOWN, 0.25 add detail
loop
```

- First loop, falcon moves down until partially in the ground
- Second loop, nothing happens since the condition is never true. The pig is not above ground.

## Q3 What happens, when does the loop stop?

```
while this.hare getDistanceTo this.panda > 1.0 is true
  do together
    this.hare moveToward this.panda, 0.25 add detail
    this.panda moveToward this.hare, 0.25 add detail
  loop
```

Q3 What happens, when does the loop stop?

```
while (this.hare.getDistanceTo(this.panda) >= 1.0) is true
do together
  this.hare.moveToward(this.panda, 0.25) add detail
  this.panda.moveToward(this.hare, 0.25) add detail
loop
```

- They move towards each other repeatedly until their distance is less than or equal to 1.0

Q4 What happens, when does the loop stop?  
(numbers different)

```
while (this.hare.getDistanceTo(this.panda) >= 1.0) is true
do together
  this.hare.moveToward(this.panda, 3.0) add detail
  this.panda.moveToward(this.hare, 3.0) add detail
loop
```

Q4 What happens, when does the loop stop?  
(numbers different)

```
while (this.hare.getDistanceTo(this.panda) >= 1.0) is true
do together
  this.hare.moveToward(this.panda, 3.0) add detail
  this.panda.moveToward(this.hare, 3.0) add detail
loop
```

- They move way too much compared to how close they are suppose to be. This could be an infinite loop!

Q5 What happens when this runs?

```
do in order
  this.bunny.setPaint(GREEN) add detail
while (this.bunny.getPaint() != RED) is true
  this.bunny.setPaint(BLUE) add detail
  this.bunny.setPaint(RED) add detail
  this.bunny.setPaint(YELLOW) add detail
loop
```

## Q5 What happens when this runs?

```
do in order
  this.bunny setPaint GREEN add detail
while this.bunny getPaint ≠ RED is true
  this.bunny setPaint BLUE add detail
  this.bunny setPaint RED add detail
  this.bunny setPaint YELLOW add detail
loop
```

- This is an infinite loop! The bunny is never red when the condition is tested. So the condition is always true!

25

## Q6 What code could I use to stop this loop?

```
do in order
  //How do I stop this loop? What do I put in place of true?
while true is true
  this.bunny resize 1.3 add detail
loop
```

10/14/21

CompSci 94 Fall 2021

26

## Q6 What code could I use to stop this loop?

```
do in order
  //How do I stop this loop? What do I put in place of true?
while true is true
  this.bunny resize 1.3 add detail
loop
```

- Continue while height smaller than some number. Stop when height is bigger.

```
while this.bunny getHeight < 2.0 is true
  this.bunny resize 1.3 add detail
  this.bunny say my height + this.bunny getHeight add detail
loop
```
