

The Seven Step Process

Seven steps of thought,
Gears in my head turning 'round,
Critical brainstorm.

Journey Through CS101

It all makes sense now,
Used to feel foreign to me,
A logical flow.

Where I Am Now

It reads like English,
But looks so complicated,
A new interest.

The If Statement

The most useful tool,
The syntax was annoying,
But boy is it cool.

The For Loop

Over and over,
The iteration just goes,
Process completed.
