

Python

The miraculous language of python
For loops, if statements, and everything between
One's and zero's into reality

Assignments

There's no doubt about it
Assignments are a pain in the butt
But the outcome is rewarding

Green Checks

Only CS101 students know how
When you get all the green checks
It's such an indescribable feeling

Empowered

It's such an empowering feeling
How the only limits are our imagination
To create something out of nothing
