

# DEF COMPSCI(CHEATS):

```
Sections = ["Quizzes", "Labs", "APTs", "Exams", "WOTOs"]  
Help = ["Professors", "TA's", "Peers", "Help Desk"]  
DueDates = {Quizzes: ["Tues", "Thurs"], "Labs": ["Sunday"]  
"APTs": ["Tues", "Thurs"], Exams ["Tues", "Thurs"], "WOTOs":  
["Friday"]}
```

## DEF TIPS&TRICKS()

tuples = (cannot change, [can change])  
listcomprehensions = efficiency  
sets = good way to get rid of repetition in a list  
askingquestions = vital  
TA's = nice dudes  
#write code steps on paper when you're confused  
#Add print() places so you can see where code went wrong  
#Make sure you look at docstrings before submitting
