

Ode to an APT

Failing is red
Passing is green,
I stare at an APT,
On my laptop screen.

I see a for loop, a dictionary
I must be in heaven!
Before I click submit,
I complete steps one through seven.

I write my code
And admire its grace,
But when I hit submit,
Only red illuminates my face.

Gasp! How is this possible?
APT how could you?
I thought we were friends,
Only five minutes before you're due!

I take a deep breath,
And open Python Tutor.
It's time to debug,
And think like a computer.

Only one minute till midnight,
I think that I've got it!
I launch the autograder,
Upload my code, and hit submit.

Green, glorious green!
I've scored 10 out of 10!
I can't wait till next week
to do it again.
