

Comp Sci 201, Here I Come

I came to Duke wanting to be pre-med  
Thinking about the requirements that lay ahead

But I have changed my mind  
To computer science, I feel inclined

Lectures on Tuesdays and Thursdays from 1:45 to 3  
You learn a lot of information, no one can disagree

My new favorite language is Python  
Thanks to Professor Rodger, an absolute icon

And thanks to Professor Washington for her saying  
“Work smarter, not harder,” I will always be replaying

Please give me another chance  
To do the APT green dance

Sakai, Piazza, Runestone, Gradescope  
Without them, how will I be able to cope

Computer Science 201, here I go  
Excited about how my skills will grow
