Delaney Eisen

The red box frightens
The green ones elude me, always
Try, try, try. Fail, fail

Green boxes promise:
Happiness. Comfort. Success
Red, again. Red.

All I see is red
In a fountain of red, green!
Just one case gives clues

How to solve this task
Is within me, I know it
One case cracked, yay!

Type, print, debug, code
Infinite loops trip me up
Again and again

I must learn, grow, code.
My fingers fly: I may have
An idea for this!

The green boxes start
Coming, coming, here they are!
Edge cases only now

Beep boop, the typing
Comes easy now. All I need is
To return values

Green. Glorious green
Growing on the screen like a
Forest canopy

Covered in the trees
I rest. My work here is done
Submitted, on time.
