

## Computer Science Haikus

CompSci is crazy.  
My APTs never run.  
Sike! They are all green.

Python code never  
Appears as intuitive  
As it really is.

Professor Rodgers  
Made us all Python cookies.  
They were wonderful.

To unzip a file  
One must uncompress the code.  
Then, you can start lab.

Recursion is when  
You make a problem smaller.  
Function calls itself.

Debugging is hard.  
I want to ace my exam,  
So I must study.
