CS 101 Assignment 7 Haikus

Coding is too hard
I didn't think I could do it
My thoughts have not changed

I may not pursue
But I am glad that I tried
Something different

I never liked green
Until I discovered APTs
Now it's beautiful

Coding assignments
The bane of my existence
They take me so long

Many nights I cried
Because I felt defeated
But I made it through

I learned a lot
What I like, what I do not
At least now I know

The friends I have made
I am so glad to have known
Tis trauma bonding

I applaud coders
The work you do is so hard
You are all so cool

Thought this was a treat
English major I will stay
I like my big books

Now I will leave you
With one final closing thought
thank you for a lot
