Interest Parallels

I had never considered studying computer science

To get a Neuro BS I must

But the brain and computers have an alliance

The parallels are something I can trust

With a huge interest in languages

Like English, Spanish, or French

The introduction of coding passages

Now Python would be something I miss

I didn't expect this overlap

Between my interests and CS101

I was introduced and then snap

Now I hope to take CS201

I've piqued an interest of maximum use

And developed skills I don't want to lose

All my fields of study will come to a truce

And I'll be capable of more than Zeus!
