Debugging, oh Debugging

Isaac Martinez

In the land of code and algorithms,

I'm a master of debugging, oh so true.

With my trusty Python by my side,

I'm tackling every error, no need to hide

Debugging, oh debugging,

My favorite part of coding.

With print statements and breakpoints,

I'm finding the bugs, no need to shout.

I'm not afraid of a little challenge,

I'll debug any code, big or small.

With my knowledge and skills,

I'll find the solution, standing tall.

Debugging, oh debugging,

My favorite part of coding.

With variables and functions,

I'm finding the bugs, no need to pout.

I may hit a roadblock,

But I won't give up.

I'll keep on trying,

Until my code is bug-free, yup.

Debugging, oh debugging,

My favorite part of coding.

With Python by my side,

I'll conquer every error, no need to cry.

In the world of code and algorithms,

I'm a master of debugging, oh so true.

With Python by my side,

I'll tackle every challenge, and make it through.
