- Is the final result of movements from these two code blocks the same?

The image displays two Scratch code blocks, each containing two sub-blocks. The top block is labeled 'do in order' and the bottom block is labeled 'do together'. Both blocks contain the same sequence of actions: a 'move FORWARD 1.0' block followed by an 'add detail' block, and a 'turn LEFT 0.5' block followed by an 'add detail' block. The 'do in order' block executes these two sub-blocks sequentially, while the 'do together' block executes them simultaneously.
