Dear novice coder,

Computer science is unlike any class you've ever taken. Unlike the natural sciences that have error margins and exceptions to every rule and dissimilar to the social sciences that ebb and flow with the changing culture, computer science gives rigid rules that you are made to conform to! There are no exceptions and no changes: if there is a problem, the problem is you!

   Don't be dissuaded! This is an opportunity to grow, see how you think, and make adjustments. Take your time!

Computer Science!
Bane of a rushing student…
Gift to the patient.

   You will have many different tasks throughout the semester, mainly APT's and assignments. Both present the opportunity to think through problems and create solutions.

APT's abound!
Which will you choose to complete?
Fun little puzzles…

   Start early and don't be afraid to ask for help. These tasks can be challenging… Above all, try your best and learn as much as you can!

Sincerely,
Someone who made it through
