<u>The duality of CS 101 – a series of real texts I have sent from this semester</u>

Love me some coding

I can't code

Coding is easy

I fixed it

I hate coding

I fixed part of it and the rest of it broke

If I could go back maybe I'd be a CS major

This took me 3 white monsters and 7 hours straight

I just spent 45 minutes trying to figure out why I was failing the test and it was a single space in the middle of about 200 lines

I am a genius

I give up

I am a coding God

If I fail another APT autogravder I'm throwing my laptop at the wall
