

CompSci 6

Programming Design and Analysis

March 16, 2010

Prof. Rodger

Announcements

- Assignment 6 was out before spring break
 - Breakout – be sure to snarf code!
- Topic today is 2D arrays
- No reading for next time.

Two-Dimensional Arrays

```
int [][] values = new int [20] [15];
```

- Declares an array with 20 rows, 15 cols
- Sum up all the values

```
int sum = 0;
```

```
for (int k=0; k<20; k++)
```

```
{
```

```
    for (int j=0; j<15; j++)
```

```
    {
```

```
        sum += values[k][j];
```

```
    }
```

```
}
```

Classwork Today

- APT – Pixmap
 - Read in 1D array and convert to 2D array
 - Print 2D array
 - Expand the 2D array
 - Print 2D array again
 - Convert new 2D array back to 1D array

Idea

- Convert 1D array to 2D array
- Each item in 2D array is replaced by 3 rows and 4 cols of that item

1D array: 1 2 3 4
2x2

2D array:

1	2
3	4

Expand 3x4

2D array expanded:

1	1	1	1	2	2	2	2
1	1	1	1	2	2	2	2
1	1	1	1	2	2	2	2
3	3	3	3	4	4	4	4
3	3	3	3	4	4	4	4
3	3	3	3	4	4	4	4

Idea (cont)

- Convert 2D array back to 1D array:

111222211122221112222333344443333444433334444
