

APTs:

A Collection of Haikus

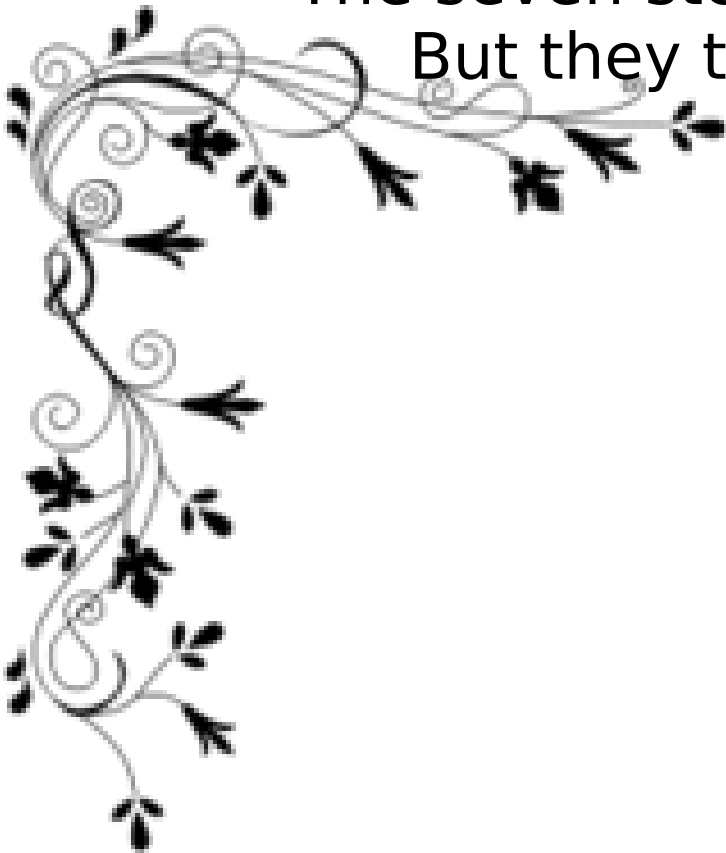

By Mark McDonough

“The Beginning”

Open APT
Immediately Start Code
That is not the way

“The Restart”

Go back and start plan
The seven steps will guide you
But they take long time

"Pain"

Submit APT
Zero out of fifty-six
What even is life?

"Success (Sort of)"

I debug the code
Oh, I used the wrong value
Now twenty are green

“One Step Forward, Two Steps Back”

I change some more code
The compiling never stops
I messed up again

“Debugging Wizard”

But wait there it is
I forgot parentheses
The hope, it returns

“Aching Body”

My mouth is so dry
Three-four hours at my laptop
I stare and I stare

“Green”

Colors fill my eyes
Euphoria consumes me
It has been finished
