

MY HEART

When I read the APT problem
and know how to start solving it

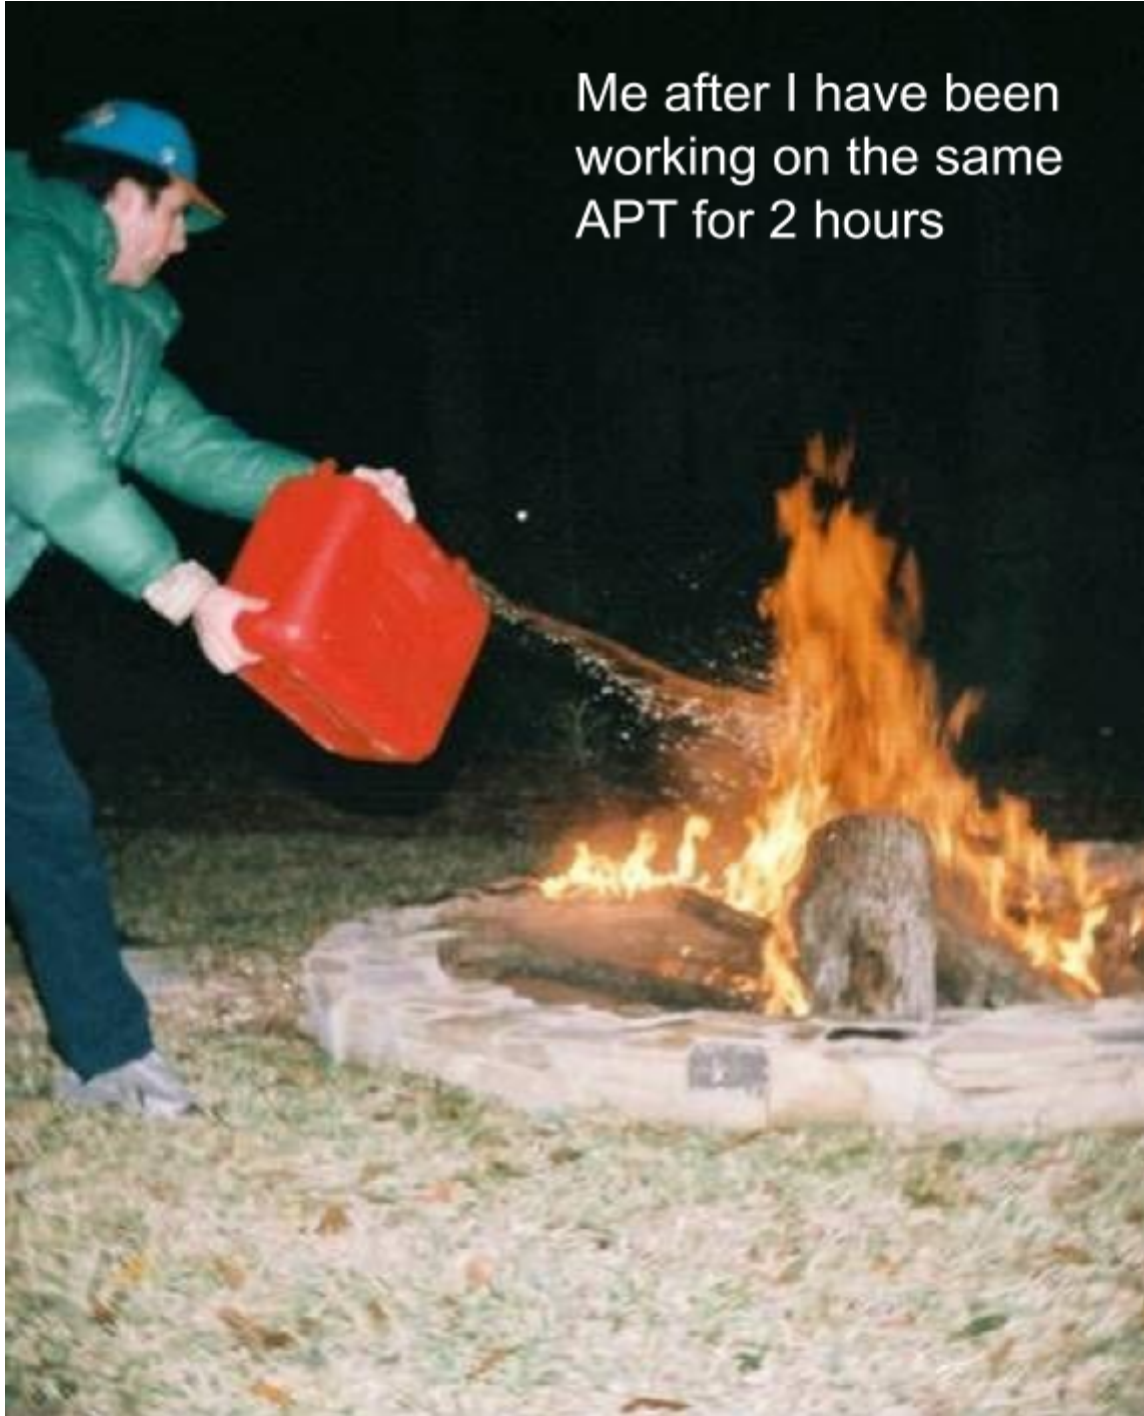

When I run the code and no
errors come up on the Python
console

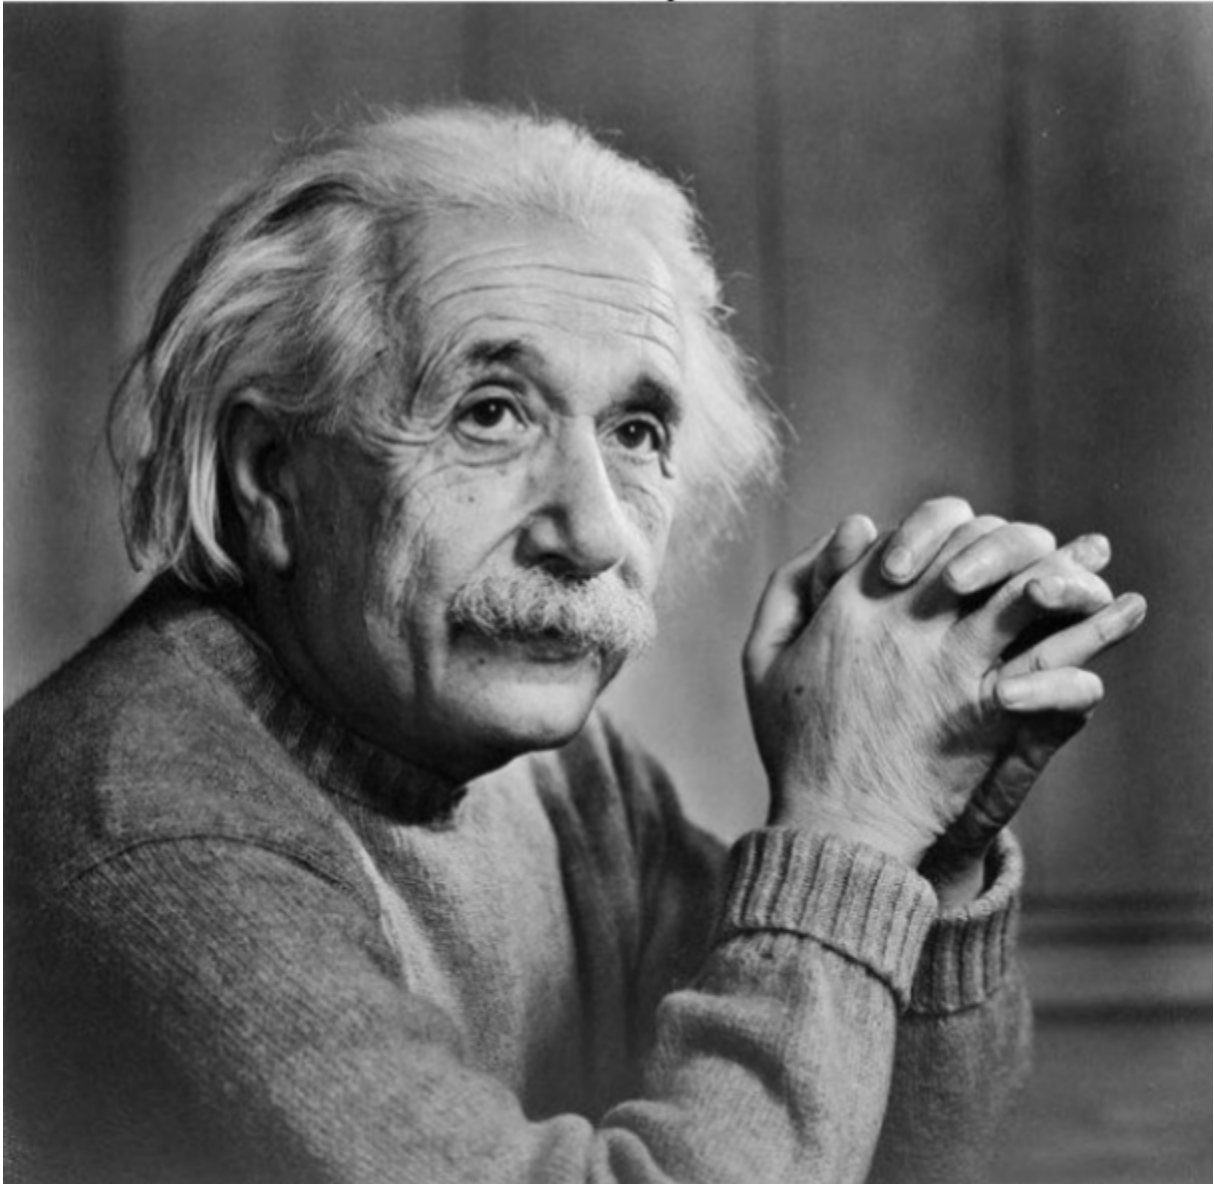

When I get all green on my APT

Me after I have been
working on the same
APT for 2 hours

Me after I solve an APT on the first try:

Types of Headaches

Migraine

Hypertension

The feeling after working on
the same code for hours and
getting the same error over
and over again

Stress
