

CompSci 101

```
def compSci(best):  
    best.append("i love  
    compsci")  
    return best
```

Use phrase with splicing and
concentration to create a string
'tryher'

```
phrase = 'thermometry'  
result = phrase[-3:] + phrase[1:4]
```

"The computer was
born to solve problems
that did not exist
before"

-Bill Gates
