Computer Science 101

BY: Lerie Buzoska

- 7 steps
- Work pieces at a time
 - Record what you have done
 - Generalize steps
 - Test out your code piece by piece.
 - Translate steps to code

Some helpful advice:

- Do not get behind! If you do, catch up as soon as possible.
- Attend office hours as frequently as possible.
- Start assignments ahead of time so you can ask questions about them
- APTs are more work than you may expect so be prepared.
- Practice makes perfect

- Test program
- Debug your program

For Assignments

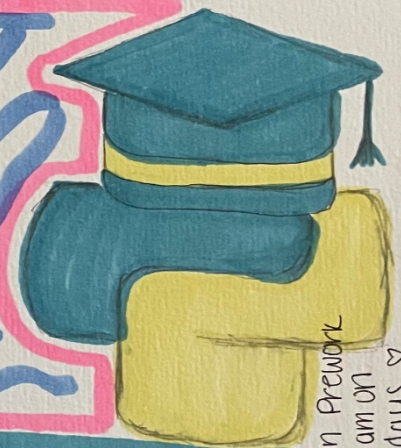

• Do not forget to submit reflection form.

- Look @ the starter code
- If you think you were right, but marked wrong, fill out regreede request.

APT Hints

- go to apt page
 - write code, upload file and submit link
 - check your grade on the grade code page by checking submissions.
 - add "if main" statement below function definition
- ```
if __name__ == '__main__':
 pass
```

END
