Jacqueline Reed

Assignment 7: Create

Goodbye CompSci101

My first time ever coding,

This course was quite foreboding.

Once it started, there was no going back,

APTs, assignments, quizzes ... what is the class hack?

Python Tutor, you were so hard to resist.

What ever would I have done if you did not exist!

Although the work felt never-ending,

It has come time to stop attending.

Goodbye Compsci101
