

# HOW TO KEEP TRACK OF CS 101 WORK

Are you feeling overwhelmed by the computer science 101 syllabus? Look no further. This guide breaks down the syllabus so you never miss a beat.

## LABS

Labs occur every Friday. There is a short pre-lab due before each lab. Submit the lab by 11:30pm on the Sunday directly following lab.

Note: lab attendance is part of your grade

## PROGRAMMING ASSIGNMENTS

There are eight assignments throughout the semester. Assignments are longer projects typically due every other week. Assignments can be time-consuming, start these early and go to UTA office hours for help.

## WOTOS

These are class participation activities that must be completed during lecture. If you are absent for class, WOTOS must be submitted by 11:30pm the next day.

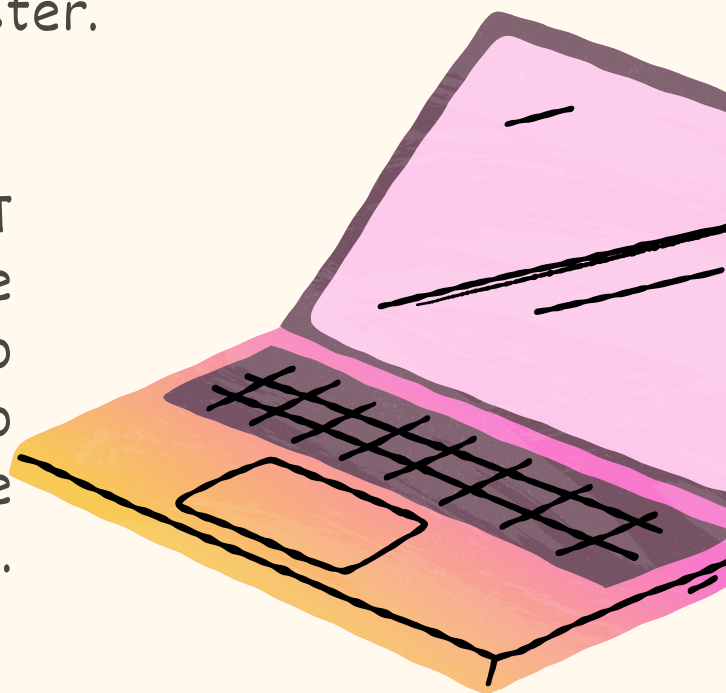

## APTS

APTs are a series of short problems. They are typically due every other week. There are seven throughout the semester.

## APT QUIZZES

There are two take-home APT quizzes during the semester. The quizzes are broken into two parts which each consist of two problems. Each part must be completed in one sitting.

## EXAMS

There are three in-class exams during the semester and one final. Old exams are posted on the course website and are a great study tool.
