# COMPSCI 101
tips

TEXTBOOK

If you are stuck on a problem, consult your textbook. It can help! It holds helpful examples and information that can help you be unstuck from a problem.
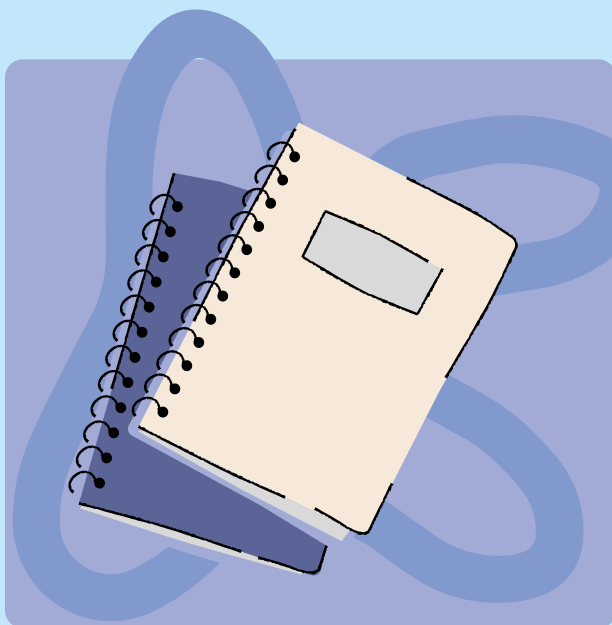

BE PATIENT

Find your own routine and rhythm. At times it can be hard to stay motivated when an assignment takes a long time to solve, but stay strong and stay steady!

ENERGY

After an especially draining moment when it comes to completing compsci assignment, take a few minutes to recollect yourself. Especially if you are stuck! Go to the gym, take a nap, eat, talk to a loved one.

LECTURE

Sometimes, code is gone over in lecture. This is super helpful, so make sure to rewatch lectures and put them to your use!

ASK FOR HELP

Ask for help! There are help desk hours for a reason. Often TAs are amazing at explaining things and breaking them down. They are super helpful and a great resource.
