COMPSCI 101 TIPS:

1. Assignments

- Make sure to begin working on your Assignments early, especially when that is listed as a note on the instructions.

2. APTs

- Try writing out your APTs on paper and understand exactly what the problem is asking you before putting it on PyCharm.
- Use Python Tutor. It helps you see exactly what your code is doing.

Problem Set 10	Details
APT-7, Due on April 25, Complete any 5 of them. Feel free to do others for more practice.	
○ WordPlay	in lecture on 4/20
○ InterestingParty	suggested
● EatDrink	suggested
○ PositiveID	suggested, think sets/intersection
○ TeamSplit	
○ Thesaurus	
○ FriendScore	
○ Pangram	
○ Moving	
○ TrophyShelf	
○ AnagramFree	Challenge, sort each word to canonicalize
Test file: Choose File EatDrink.py	
	test/run

3. Help

- Go to Office Hours! The TAs are there to help!

4. Exams

- Review any notes you have taken throughout the semester.
- Do the practice exams!
- Review APTs

5. Practice, practice, practice

- Though it might seem challenging at first, over time you understand more! Eventually you will be able to finish APTs or figure out your code at a faster pace.
