COMPSCI 101
Assignment 7
Poem

"Is it too late to join the course?"
I thought to myself
I decided to email Prof. Rodger
I was thankfully told I could do so

I will be honest as a graduating senior
It was too much work for me
I just wanted to enjoy myself with my friends
In the end however it was all worth it

Quizzes to assignments to APTs
Three midterms to APT Quizzes
I learned a lot about programming
And hoped Economics (my major) utilized Python more (a little joke here)

It is improbable that I take other CS classes
But the skills I have developed during CS101
Will stay with me forever for sure
Till next time CS!
