

Hello my dear friend
Or does "friends" even begin to capture
All the Thursday nights we spent
Fingers lightly touching
Faces mere inches apart
Friends don't speed your heart rate
Not like that

My dear friend
What a wonderful way we met
A last-minute decision bought us together
When I signed up for CompSci 101
And met you there
A week later
A giant leap of faith

You know my dear friend
Sometimes I am in awe
Of the fun times we had
Dancing to quizzes
Humming at green boxes
A glorious
Battle of wits

I don't know when
We became more than friends
I can't pinpoint a specific moment
But friends don't occupy your mind
When you're racing to eat
Itching to meet again
Anticipating

But at last, my dear friend
All great times must come to an end
I will remember our laughter and smiles
Your little rules and tricks
My patience for you
Until we meet again
My dear friend python
