

On the first day of class,
To download PyCharm I was told.
I think there is a new version,
Don't download the old!

My APT deadline drew near,
An error I received.
No time to rectify the mistake,
My grade was surely grieved.

My third assignment was a doozy,
Long nights I spent alone.
My night was already bad,
Then I tripped over a cone!

Oh, formula sheet for the exam,
How I love you so!
And for this exam I prepared,
I studied with my bro.

I sat for the first test,
Nervous, and anxious too.
I was feeling very tired,
Guess I forgot my morning brew!

Now we near the end,
How sad my life will be,
I hope I get an A,
I'd be sad to get a C!

For loop, you are my bestie,
While loop, I will NOT miss you.
But coding is a useful skill,
To see the world from a new point of view!
