

Written Story

Once upon a time, there was a group of students who decided to take CompSci 101. At first, they were all nervous and unsure if they could handle the course. But as the days went by, they found themselves learning new things and feeling more confident in their abilities. The professor was amazing, always patient and willing to help each student with any questions they had. The class itself was challenging, but the students found themselves enjoying the challenges and feeling a sense of accomplishment when they successfully completed each assignment. As the semester went on, the students grew closer to each other, forming study groups and helping each other with difficult concepts. They would stay up late into the night, discussing algorithms and debugging code.

Finally, the end of the semester arrived, and the students found themselves reflecting on all that they had learned. They realized that they had not only gained knowledge of computer science, but also developed important problem-solving and critical thinking skills that would benefit them in any field. To commemorate their experience, the students decided to create a video. It would be an advertisement for CompSci 101, showcasing their excitement and passion for the subject. They gathered together and put on their green shirts, a symbol of their dedication to the course. They danced around campus, holding up signs with code snippets and algorithms written on them. As they danced, they sang a song they had written themselves, celebrating their love for CompSci 101. The video ended with them all cheering and high-fiving each other, proud of all that they had accomplished. The video was a hit, and it went viral on social media. It even caught the attention of the professor, who was touched by the students' dedication and

enthusiasm. In the end, the students realized that Compsci 101 had not only taught them about computer science, but had also brought them together and taught them valuable life skills. They were grateful for the experience and proud to have been a part of it.
