

## CS 101 Assign 7

*\*To the tune of Jingle Bells\**

Dashing through python,  
For the very first time  
What is going on  
I get an error called "Runtime"

I read the textbook and take notes  
My APTs are turning green  
Tuples, for loops, lists, and floats  
This isn't as bad as it seems!

Oh! APTs, dictionaries  
GuessWord's a joy to play  
Oh what fun it is to run my code that goes my way, hey!

Wotos in class, autogrades that pass  
Labs are on Fridays  
Oh what fun it is to run my code that goes my way!
