# Compsci 101 Lists, Mutation, Objects

Susan Rodger

January 31, 2023

#### **F** is for ...

- Function
  - Key to all programming
- Floating Point
  - Decimal numbers aka Python float
- File
  - Sequence of stored bits

1/31/23 1/31/23 Compsci 101, Spring 2023 Compsci 101, Spring 2023

## **Annie Easley**

- American computer scientist, mathematician, and rocket scientist
- Worked at NACA and NASA
- BS in Math, Cleveland State
- Leader in developing the software for the Centaur rocket stage

On microaggressions: "If I can't work with you, I will work around you"

#### **Announcements**

- Assign 1 Faces, Sakai QZ due TODAY (no grace day)
  - Program is due Thursday (has one grace day)
- Lab 3 Friday, Do Prelab 3 before lab
- Sakai QZ due by lecture time each day
- Exam 1 Tuesday, February 7
  - In person during class, covers topics through Feb 2
  - See old exams, python ref sheet on 2/7 date on calendar
  - Practice writing code on paper, more next time
- Need SDAO letters for exams!
  - Email them to Prof. Velasco. yvelasco@cs.duke.edu

1/31/23 Compsci 101, Spring 2023 1/31/23 Compsci 101, Spring 2023

# Python Reference Sheet, is attached to your exam (see link on calendar page, under 2/7)

Mathematical Operators  Symbol Meaning Example		
	addition	4 + 5 = 9
-	subtraction	9 - 5 = 4
*	multiplication	3*5 = 15
/ and //	division	6/3 = 2.0 6/4 = 1.5 6//4 = 1
%	mod/remainder	5 % 3 = 2
**	exponentiation	3**2 = 9, 2**3 = 8
	String Operators	·
+	concatenation	"ab"+"cd"="abcd"
*	repeat	"xo"*3 = "xoxoxo"
	Comparison Operators	
==	is equal to	3 == 3 is True
!=	is not equal to	3 != 3 is False
>=	is greater than or equal to	4 >= 3 is True
<=	is less than or equal to	4 <= 3 is False
>	is strictly greater than	4 > 3 is True
<	is strictly less than	3 < 3 is False
	Boolean Operators	
	x=5	
not	flips/negates the value of a bool	(not x == 5) is False

#### **PFTD**

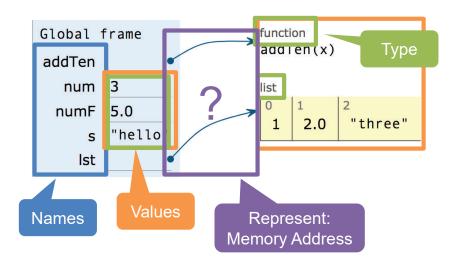

- Functions as Parameters
- Debugging
- List concatenation and nesting
- Mutability

1/31/23 Compsci 101, Spring 2023 5 1/31/23 Compsci 101, Spring 2023 Compsci 101, Spring 2023

#### Learning Goals: Faces

- Understand differences and similarities:
  - Function definitions vs function calls
  - Functions with return statements vs those without
  - Functions with parameters vs those without
     Functions can be arguments
- Be creative and learn lesson(s) about software design and engineering
  - Create a small, working program, make incremental improvements.
  - Read the directions and understand specifications!

# Name vs Value vs Type

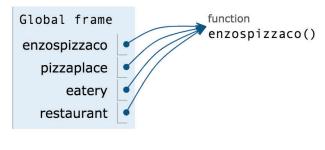

1/31/23 Compsci 101, Spring 2023 7 1/31/23 Compsci 101, Spring 2023

#### What are the arrows?

- Name: Enzo's Pizza Co.
- Address (arrow): 2608 Erwin Rd # 140, Durham, NC

27705

Value: Physical Store

1/31/23 Compsci 101, Spring 2023

# Pizza.py

```
def enzospizzaco():
          print("Pizza!")
 8
           return "2608 Erwin Rd # 140, Durham, NC 27705"
9
      def eatfood(where):
10
          print("Let's go eat!")
11
12
           address = where()
          print("The address is", address)
13
14
15
      if __name__ == '__main__':
           eatfood(enzospizzaco)
16
```

1/31/23 Compsci 101, Spring 2023 10

## Functions can be arguments

```
1 def enzospizzaco():
        print("Pizza!")
        return "2608 Erwin Rd # 140, Durham, NC 27705"
    def eatfood(where):
        print("Let's go eat!")
        address = where()
        print("The address is", address)
 9
 10 if __name__ == '__main__':
11
        eatfood(enzospizzaco)
         Global frame
                                      function
                                      enzospizzaco()
         enzospizzaco
               eatfood
                                      eatfood(where)
         eatfood
                where
1/31/23
```

#### In Assignment 1 Faces

```
def face_with_mouthAndEyes(mouthfunc,eyefunc):
    print(part_hair_squiggly())
    print(eyefunc())
    print(part_nose_up())
    print(mouthfunc())
    print(part_chin_simple())
```

1/31/23 Compsci 101, Spring 2023

#### In Assignment 1 Faces

```
def face_random():
   eyefunc = part_eyes_sideways
   x = random.randint(1,3)
   if x == 1:
       eyefunc = part_eyes_ahead
   <Code Not Shown>
    # now call the function
    face_with_mouthAndEyes(mouthfunc,eyefunc)
```

1/31/23 Compsci 101, Spring 2023

# WOTO-1: Functions as Parameters? http://bit.ly/101s23-0131-1

#### In Assignment 1 Faces

```
def face_random():
    eyefunc = part_eyes_sideways
    x = random.randint(1,3)
    if x == 1:
        eyefunc = part_eyes_ahead
   <Code Not Shown>
    # now call the function
```

1/31/23 Compsci 101, Spring 2023

face\_with\_mouthAndEyes(mouthfunc,eyefunc)

# Debugging

- Finding what is wrong + fixing it
  - Finding is its own skill set, and many find difficult
  - Fixing: revisit Step 1—5

1/31/23 Compsci 101, Spring 2023 1/31/23 Compsci 101, Spring 2023

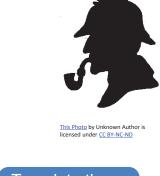

#### **Debugging Steps**

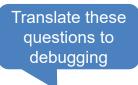

- 1. Write down exactly what is happening
  - 1. input, output, what should be output
  - 2. \_\_\_\_ happened, but \_\_\_\_ should happen
- 2. Brainstorm possible reasons this is happening
  - 1. Write down list of ideas
- 3. Go through list
- 4. Found it?
  - 1. Yes, fix it using the 7-steps
  - 2. No, go back to step 2

1/31/23 Compsci 101, Spring 2023 24 1/31/23 Compsci 101, Spring 2023

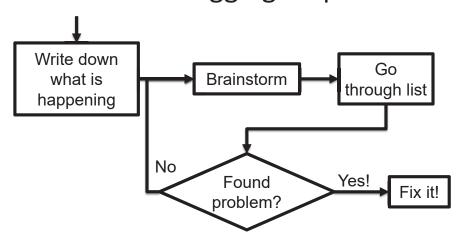

# Relate W's to Debugging

- Who was involved?
- What happened?
- Where did it take place?
- When did it take place?
- Why/How did it happen?

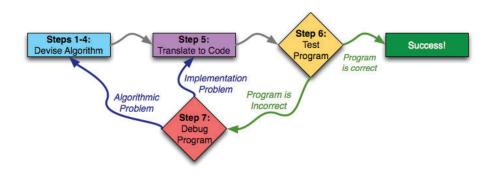

#### **Debugging Steps**

# Step 7 -> Steps 1-4 or 5

# Which year is a leap year?

WOTO-2: Buggy Leap Year http://bit.ly/101s23-0131-2

- A Leap Year must be divisible by four.
- But Leap Years don't happen every four years ... there is an exception.
  - If the year is also divisible by 100, it is not a Leap Year unless it is also divisible by 400.

1/31/23 Compsci 101, Spring 2023 30 1/31/23 Compsci 101, Spring 2023

#### List Concatenation

List concatenation:

• String concatenation:

 $\cdot$  [1, 2] + [3, 4] == [1, 2, 3, 4]

# List examples

#### **Nested Lists**

- Lists are heterogenous, therefore!
  - lst = [1, 'a', [2, 'b']] is valid
  - len(lst) ==

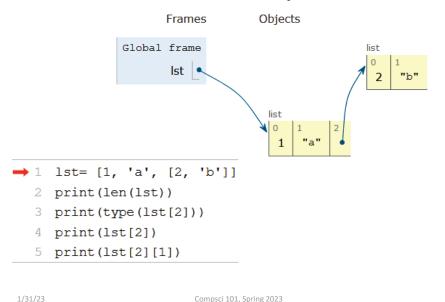

- How to index?
  - [...] all the way down

1/31/23 Compsci 101, Spring 2023

#### **Mutating Lists**

- lt = ['Hello', 'world']
  - How to change lt to: ['Hello', 'Ashley']
- Two ways: 1. Build new list or 2. modify list
  - 1. Concatenation: lt = [lt[0]] + ['Ashley']
  - 2. Index: lt[1] = 'Ashley'
- How to change 'b' in lt = [1, 'a', [2, 'b']]?
  lt[2][1] = 'c'

## **Nested Lists with Python Tutor**

# Mutating Lists code

```
lst1 = ['Hello', 'world']
print(lst1)
lst2 = [lst1[0]] + ['Ashley']
print(lst2)
print(lst1)
lst1[1] = 'Ashley'
print(lst1)

lst3 = [1, 'a', [2,'b']]
print(lst3)
lst3[2][1] = 'c'
print(lst3)
```

# WOTO-3 List Mutation http://bit.ly/101s23-0131-3
