Announcements

- **APT-3 due Thursday**
- **Assign 3-Transform out today, due Thursday, March 2**
 - Sakai quiz Assign3 – Due Tues, Feb 28 (no grace day)
- **Lab 6 Friday - Prelab out today**
- **APT Quiz 1 is Thurs Feb 23-Mon Feb 27**
 - Take during this time
 - Two parts – each part has two APTs
 - Each part is timed

PFTD

- APT Quiz 1
- Pancakes
- Parallel Lists
- List Comprehensions
- Assignment 3 - Transform Assignment

2/21/23

Compsci 101, Spring 2023 5

APT Quiz 1 Feb 23-27

- Opens 2/23 1pm
- Closes at 11pm 2/27– must finish all by this time
- There are two parts based on APTs 1-3
 - Each part has two APT problems
 - Each part is 2 hours – more if you get accommodations
 - Each part starts in Sakai under tests and quizzes
 - Sakai is a starting point with countdown timer that sends you to a new apt page just for each part
 - Could do each part on different day or same days
- Old APT Quiz so you can practice (not for credit) – on APT Page

2/21/23

Compsci 101, Spring 2023 6

APT Quiz 1

- Is your own work!
 - No collaboration with others!
 - Use your notes, lecture notes, your code, textbook
 - DO NOT search for answers! No Chat-GPT!
 - Do not talk to others about the quiz until grades are posted
- Post private questions on Ed Discussion
 - We are not on between 9pm and 9am!
 - We are not on all the time, especially weekends
 - Will try to answer questions between 9am – 9pm
 - About typos, cannot help you in solving APTs
- See 101 APT page for tips on debugging APTs

2/21/23

Compsci 101, Spring 2023 7

APTs

[Home](#) [About](#) [Dates](#) [Labs](#) [Assign](#) [APTs](#) [Help](#) [Forms](#) [Resources](#) [Sakai](#)

APT Quiz

There will be two APT Quizzes that are just like APTs but are your own work and are timed. Start the APT quiz on Sakai under quizzes, but not until you are ready to take the quiz.

APTs

See below for hints on what to do if your APT doesn't run.

For each problem in an APT set, complete these steps by the due date

- first click on the APT set below to go to the APT page.
- write the code, upload the file, select the problem, and click the **Submit** link
- **check your grade** on the grade code page by clicking on **check submissions**

In solving APTs, your program should work for all cases, not just the test cases we provide. We may test your program on additional data.

APT	Due Date
APT-1	January 26
APT-2	February 9
APT-3	February 23
PRACTICE FOR APT QUIZ 1	NOT FOR CREDIT

We may do some APTs partially in class or lab, but you still have to do them and submit them. There will usually be extra appts listed. You can do more than required to challenge yourself. We do notice if you do more APTs than those required. If you do extra APTs, they still have to be turned in on the due date.

Regrades

If you have concerns about an item that was graded (lab, apt or assignment), you have one week after the grade is posted to fill out the [regrade form here](#).

Problems Running an APT? Some Tips!

2/21/23

Compsci 101, Spring 2023 8

Pancakes!

APT Pancake

- How do you solve this (or any) problem?
 - 7 Steps!
- Some APTs are hard problems to solve (step 1-4)
 - Translating to code easy
- Some APTs have easy-to-see algorithms (step 5)
 - Translating to code is hard

APT: Pancakes

Problem Statement

You're a short-order cook in a pancake restaurant, so you need to cook pancakes as fast as possible. You have one pan that can fit `capacity` pancakes at a time. Using this pan you must cook `numCakes` pancakes. Each pancake must be cooked for five minutes on each side, and once a pancake starts cooking on a side it has to cook for five minutes on that side.

However, you can take a pancake out of the pan when you're ready to flip it after five minutes and put it back in the pan later to cook it on the other side.

Write the method, `minutesNeeded`, that returns the shortest time needed to cook `numCakes` pancakes in a pan that holds `capacity` pancakes at once. See the examples.

Specification

```
filename: Pancakes.py

def minutesNeeded (numCakes, capacity):
    """
    return integer representing time to cook pancakes
    based on integer parameters as described below
    """
```

Examples

```
1. numCakes = 0
   capacity = 4

   Returns: 0
```

It takes no time to cook 0 pancakes.

```
2. numCakes = 2
   capacity = 2

   Returns: 10
```

You cook both pancakes on one side for five minutes, then flip them over and cook each on the other side for another five minutes.

Step 1: Solve an instance

Three pancakes in a two-cake pan

- First 5 minutes
 - 2 half cooking
 - 1 uncooked
- Second 5 minutes
 - 2 half cooking
 - 1 almost cooked

2/21/23

Compsci 101, Spring 2023

14

Step 1: Solve an instance

- **What kind of instances? Simple cases that are quickly solved**
 - What are these in Pancake problem?
- **Don't solve for N, solve for 5 (generalize is step 3)**
 - What to do when there are two parameters?
 - Fix one, vary the other one
 - Helps identify cases

Problem

- **Given a file of words, which word occurs the most**
- **For each word count how many times it occurs**
- **Determine which word has the highest count**

2/21/23

Compsci 101, Spring 2023

Parallel Lists

- We will use parallel lists to track data
 - Each word is stored in a list named **words**
 - Word's count is stored in a list named **counts**
 - # occurrences of **words** [k] is in **counts** [k]

```
["apple", "fox", "vacuum", "lime"]  
[ 5,      2,      25,     15 ]
```

words

counts

Parallel Lists

- We will use parallel lists to track data
 - Each word is stored in a list named **words**
 - Word's count is stored in a list named **counts**
 - # occurrences of **words** [k] is in **counts** [k]

```
["apple", "fox", "vacuum", "lime"]  
[ 5,      2,      25,     15 ]
```

- What happens when we read a word?

Read word "vacuum"?

Parallel Lists

- We will use parallel lists to track data
 - Each word is stored in a list named **words**
 - Word's count is stored in a list named **counts**
 - # occurrences of **words** [k] is in **counts** [k]

```
["apple", "fox", "vacuum", "lime"]  
[ 5,      2,      26,     15 ]
```

- What happens when we read a word?

Read word "cat"?

Calculate word most often in file

```
6 def wordOccursTheMost(fname):  
7     f = open(fname)  
8     words = []  
9     counts = []  
10    for line in f:  
11        line = line.strip() #remove newline  
12        data = line.split()  
13        for word in data:  
14            if word not in words:  
15                words.append(word)  
16                counts.append(1)  
17            else: # update word  
18                pos = words.index(word)  
19                counts[pos] += 1  
20    f.close()
```

WOTO-2 Word Most Often

<http://bit.ly/101s23-0221-2>

List Comprehension Accumulator in one line

```
def onlyPos(nums):  
    ret = []  
    for n in nums:  
        if n > 0:  
            ret.append(n)  
    return ret  
  
print(onlyPos([1,2,3,-1,-2,-3]))
```

```
return [n for n in nums if n > 0]
```

- **List Comprehension**
 - We will use a complete, but minimal version of list comprehensions, much more is possible

List Comprehension Syntax

- **V is any variable: all list elements in order**
- **V_EXP is any expression, often use V**

List Comprehension Syntax

- **if part optional - BOOL_EXP is a Boolean expression usually using V**

List Comprehension Examples

```
print( [n*2 for n in range(6)] )
```

```
print( [n for n in range(10) if n % 2 == 1] )
```

2/21/23

Compsci 101, Spring 2023 48

WOTO-3 List Comprehension Examples

<http://bit.ly/101s23-0221-3>

2/21/23

Compsci 101, Spring 2023 52

List Comprehension Examples

```
print( [n/2 for n in range(10) if n % 2 == 0] )
```

```
lst = ['banana', 'pineapple', 'apple']  
print( [c for c in lst if 'n' in c] )
```

2/21/23

Compsci 101, Spring 2023 50

Assignment 3: Transform

- **Reading and writing files**
 - We've seen how to read, writing is similar
 - Open, read, and close
 - Open, write, and close - `.write(...)`
- **Apply a function to every word in a file**
 - Encrypt and decrypt
 - Respect lines, so resulting file has same structure

2/21/23

Compsci 101, Spring 2023 54

Encrypting and Decrypting

- **We give you:**
 - Transform.py
 - Vowelizer.py - Removes vowels, then re-vowelize
- **You implement**
 - Pig Latin
 - Caesar cipher
- **Challenge: Shuffleizer**

2/21/23

Compsci 101, Spring 2023 55

Concepts in Starter Code

- **Global variables**
 - Generally avoided, but very useful
 - Accessible in all module functions
- **FileDialog and tkinter**
 - API and libraries for building UI and UX
- **Docstrings for understanding!**

[Look at code](#)

2/21/23

Compsci 101, Spring 2023 56

Transform – Remove Vowels

- **First line of twain.txt:**

```
1 The Notorious Jumping Frog of Calaveras County
```
- **Run Transform.py on twain.txt**
- **Set as:**

```
doTransform("-nvw", Vowelizer.encrypt)
#doTransform("-rvw", Vowelizer.decrypt)
```
- **Results in new file: twain-nvw.txt**
- **First line of twain-nvw.txt is:**

```
1 Th Ntrs Jmpng Frg f Clvrs Cnty
```

2/21/23

Compsci 101, Spring 2023 57

Transform – Get vowels back?

- **First line of twain-nvw.txt:**

```
1 Th Ntrs Jmpng Frg f Clvrs Cnty
```
- **Run Transform.py on twain-nvw.txt**
- **Set as:**

```
#doTransform("-nvw", Vowelizer.encrypt)
doTransform("-rvw", Vowelizer.decrypt)
```
- **Results in new file: twain-nvw-rvw.txt**
- **First line of twain-nvw-rvw.txt is:**

```
1 oath antares jumping fargo fe cleavers county
```

2/21/23

Compsci 101, Spring 2023 58

Transform – Vowels summary

- **First line in twain.txt**

```
1 The Notorious Jumping Frog of Calaveras County
```

- **After removing vowels – “encrypt”**

```
1 Th Ntrs Jmpng Frg f Clvrs Cnty
```

- **After trying to re-vowelize – “decrypt”**

```
1 oath antares jumping fargo fe cleavers county
```
