Y is for ...

- **YAML and YACC**
 - Yet Another ...
- **Y2K:** <https://www.youtube.com/watch?v=rblt2EtFfC4>
 - How many bits are enough bits?
- **YouTube**
 - Connected to computing ...

Z is for ...

- **Zero**
 - There are two, or 10 bits in the universe
- **Zip**
 - Compressed file archive format
- **Zork**
 - Text-based adventure game
 - <https://www.youtube.com/watch?v=TNN4VPIRBJ8>

Raja Kushalnagar

- **Professor Gallaudet University**
- **PhD CS and MS of Laws (LLM) in Intellectual Property and Information Law from Univ Houston**
- **Juris Doctor (JD) Texas Southern University**
- **As a Deaf professor, he advocates in bringing consumers, industry, and policymakers together on accessibility issues, advocating for a deaf/hard of hearing perspective, as well as developing prototype technologies for improving the accessibility of such systems.**

Announcements

- **APT-7 due today**
 - Today is last day for Office Hours
 - One grace day, NO LATE DAYS!
 - MUST TURN in BY tomorrow
- **Assign 7 Create due, tomorrow**
 - Extended Grace period is through Sunday, April 30
 - No turnin's after that.
 - You turn in on SAKAI!
- **Last time for UTA office hours is tonight!**

- **Exam 3 Regrade requests thru Thursday night**
 - Everyone gets 2 extra points on Exam 3!!!!

4/25/23

Compsci 101, Spring 2023

5

Final Exam –
Thurs, May 4
9am - Noon

- **Exam is in our regular classroom, Griffith Theatre**

- **Set three alarms!!!!!!**

4/25/23

Compsci 101, Spring 2023

7

PFTD

- **Final Exam**
- **How do dictionaries work so fast?**
- **Finishing up**
 - What more is there in CS?

4/25/23

Compsci 101, Spring 2023

6

Final Exam

- **Study like you studied for Exam 3**
 - Use Exam 3 handout
- **We only have a little material since then**
 - Recommender
 - – this is all about stuff we did before
 - Modules
 - Exceptions
 - Recursion – reading only, no writing
- **Not on the exam**
 - Images, turtles, exceptions, writing classes (lab 10)

4/25/23

Compsci 101, Spring 2023

8

Calculate Your Grade

- From “About” tab on course web page

Labs	10%
Sakai Quizzes	5%
Class Participation (WOTOs)	5%
Apts	10%
Programming Assignments	10%
APT Quizzes	10%
Three Exams(12% each) and Final(14%)	50%

4/25/23

Compsci 101, Spring 2023 9

Time for CompSci 101 Course Eval

- Please fill out Duke Course Eval and give me feedback on the course!

4/25/23

Compsci 101, Spring 2023 11

More on Grades

- Class Participation-WOTOs – **ignore** the first two weeks (drop/add period), plus drop **10 points**
- Sakai Quizzes **299** points– will drop **39** points
 - Your points/260, can’t get more than 100
- Lab – drop **15** points (each lab is 5 pts)
 - Except Lab 10 that was required
- That is all we drop

4/25/23

Compsci 101, Spring 2023 10

How do Dictionaries work so fast?

- How are they implemented?

4/25/23

Compsci 101, Spring 2023 12

Review: Problem – which word occurs the most frequently in a file

- **Need to count how many times each word occurs**
 - slowcount – for each word in a set, calls count
 - fastcount – counting dictionary

4/25/23

Compsci 101, Spring 2023 13

Using fastcount

- **Update count if we've seen word before**
 - Otherwise it's the first time, occurs once

```
28 def fastcount(words):
29     d = {}
30     for w in words:
31         if w in d:
32             d[w] += 1
33         else:
34             d[w] = 1
35     return sorted(d.items())
```

4/25/23

Compsci 101, Spring 2023 15

slowcount function Short Code and Long Time

- **See module WordFrequencies.py**
 - Find # times each word in a list of words occurs
 - We have tuple/pair: word and word-frequency

```
37 def slowcount(words):
38     pairs = [(w, words.count(w)) for w in set(words)]
39     return sorted(pairs)
```

- **Think: How many times is words.count(w) called?**
 - Why is set(words) used in list comprehension?

4/25/23

Compsci 101, Spring 2023 14

Let's run them and compare them!

- **Run with Melville and observe time**
 - slowcount about 0.76 seconds
 - fastcount about 0.00 seconds
- **Run with Hawthorne and observe time**
 - slowcount about 14.6 seconds
 - fastcount about 0.03 seconds

4/25/23

Compsci 101, Spring 2023 16

Here is the idea behind how dictionaries work

Simple Example

Want a mapping of Soc Sec Num to Names

- **Duke's CS Student Union wants to be able to quickly find out info about its members. Also add, delete and update members. Doesn't need members sorted.**

267-89-5431 John Smith

703-25-6141 Ademola Olayinka

319-86-2115 Betty Harris

476-82-5120 Rose Black

- **Dictionary d – SSN to names**
 - $d['267-89-5431'] = \text{'John Smith'}$
 - How does it find 'John Smith' so fast?

Dictionary $d(\text{SSN}) = (\text{SSN}, \text{name})$

- **We actually would map the SSN to the tuple of (SSN, name).**
- **That is a lot to display on a slide, so we will just show SSN to name**
- **But remember name is really a tuple of (SSN,name)**

Simple Example

Let's look under the hood.

How are dictionaries implemented?

- **Dictionaries implemented with a list, in a clever way**
- **How do we put something into the list fast?**
- **How do we find it in the list quickly?**
 - $d['267-89-5431'] = \text{'John Smith'}$
- **List size is 11 – from 0 to 10**
- **$d['267-89-5431']$ calculates index location in list of where to put this tuple (SSN,name)**
- **Use a function to calculate where to store 'John Smith'**
 - $H(\text{ssn}) = (\text{last 2 digits of ssn}) \bmod 11$
 - Called a Hash function

Have a list of size 11 from 0 to 10

- Insert these into the list
- Insert as (key, value) tuple
(267-89-5431, John Smith)
(in example, only showing name)

WOTO-3 How Dictionaries Work <http://bit.ly/101s23-0425-1>

A peek into CompSci 201

- **Sorting list of numbers**
- **Quicksort algorithm**
 - Uses recursion

Quicksort - Idea

- Pivot – select and adjust the list
 - Select one of the elements
 - Put it where it belongs in sorted order
 - Put elements less than it, to its left
 - Put elements greater than it, to its right
- Recursively sort the elements to its left
- Recursively sort the elements to its right
- Done!

Quicksort - Idea

- Pivot – select and adjust list
- Recursively sort the elements to its left
- Recursively sort the elements to its right

5 9 1 4 3 6 2 7

4/25/23

Compsci 101, Spring 2023

30

Quicksort: fast in practice

```
def doQuick(list, first, last) {  
  if (first >= last) return  
  
  piv = pivot(list, first, last)  
  doQuick(list, first, piv-1)  
  doQuick(list, piv+1, last)  
}
```

4/25/23

Compsci 101, Spring 2023

33

Sir Anthony (Tony) Hoare

Invented Quicksort in 1962
- he didn't get recursion

Turing Award winner
- programming language design
- Algol 60

“There are two ways of constructing a software design. One way is to make it so simple that there are obviously no deficiencies. And the other way is to make it so complicated that there are no obvious deficiencies.”

“Inside every large program is a small program struggling to get out.”

4/25/23

Compsci 101, Spring 2023

35

What is Computing? Informatics?

- **What is computer science, what is its potential?**
 - What can we do with computers in our lives?
 - What can we do with computing for society?
 - Will networks transform thinking/knowing/doing?
 - Society affecting and affected by computing?
 - Changes in science: biology, physics, chemistry, ...
 - Changes in humanity: access, revolution (?), ...
- **Privileges and opportunities available if you know code**
 - Writing and reading code, understanding algorithms
 - Majestic, magical, mathematical, mysterious, ...

4/25/23

Compsci 101, Spring 2023

36

Computing - solve all problems?

- **Some problems can be solved 'efficiently'**
 - Run large versions fast on modern computers
 - What is 'efficient'? It depends
- **Some cannot be solved by computer.**
 - Provable! We can't wait for smarter algorithms
- **Some problems have no efficient solution**
 - Provably exponential 2^n so for "small" n ...
- **Some have no known efficient solution, but**
 - If one does they all do!

4/25/23

Compsci 101, Spring 2023 37

How do you calculate the best path?

- Try all paths
 - Atlanta, Raleigh, Dallas, Reno, Chicago
 - Add up the distance in this order
 - Dallas, Atlanta, Raleigh, Reno, Chicago
 - Add up the distance in this order
 - Etc.
- Would you agree to code this up?

4/25/23

Compsci 101, Spring 2023 39

Problem: Traveling Band

- Band wants you to schedule their concerts.
- They don't like to travel. Minimize the time they are on the bus!
- Given N cities, what is the best schedule (shortest distance) to visit all N cities once?

4/25/23

Compsci 101, Spring 2023

Traveling Band questions
bit.ly/101s23-0425-2

4/25/23

Compsci 101, Spring 2023 40

How is Python like all other programming languages, how is it different?

Find all unique/different words in a file, in sorted order

Unique Words in Python

```
def main():
    f = open('/data/melville.txt', 'r')
    words = f.read().strip().split()
    allWords = set(words)

    for word in sorted(allWords):
        print(word)

if __name__ == "__main__":
    main()
```

Unique words in Java

```
import java.util.*;
import java.io.*;
public class Unique {
    public static void main(String[] args)
        throws IOException{
        Scanner scan =
            new Scanner(new
                File("/data/melville.txt"));
        TreeSet<String> set = new TreeSet<String>();
        while (scan.hasNext()){
            String str = scan.next();
            set.add(str);
        }
        for(String s : set){
            System.out.println(s);
        }
    }
}
```

Unique words in C++

```
#include <iostream>
#include <fstream>
#include <set>
using namespace std;

int main(){
    ifstream input("/data/melville.txt");
    set<string> unique;
    string word;
    while (input >> word){
        unique.insert(word);
    }
    set<string>::iterator it = unique.begin();
    for(; it != unique.end(); it++){
        cout << *it << endl;
    }
    return 0;
}
```

4/25/23

Compsci 101, Spring 2023 51

What is next?

- **CompSci 201**
 - Java, efficiency, other ways to organize data
- **CompSci 230 – can take concurrently with 201**
 - Discrete Mathematics
 - Course substitutions if you take a lot of math/stats
- **CompSci 260 Computational Biology**
- **CompSci 216 Everything Data**
- **CompSci 240 Race, Gender, Class and Computing**

4/25/23

Compsci 101, Spring 2023 53

Unique words in PHP

```
<?php
$wholething = file_get_contents("file:///data/melville.txt");
$wholething = trim($wholething);

$array = preg_split("/\s+/", $wholething);
$uni = array_unique($array);
sort($uni);
foreach ($uni as $word){
    echo $word."<br>";
}

?>
```

4/25/23

Compsci 101, Spring 2023 52

What to do over Winter Break? Take a Duke Coursera course Free

- **Course on Java**

VIDEO

Functions

```
int myFunction(int x, int y) {
    int z = 2 * x - y;
    return z * x;
}

int f(int n) {
    return 3 + myFunction(n, n+1);
}

int g() {
    int a;
    a = myFunction(3, 7);
    int b = f(a * a);
    return b;
}
```

1. Create **frame** for called function
2. Pass **parameters**: copy values into frame

4/25/23

Compsci 101, Spring 2023 54

Duke Coursera course on Java

- **Coursera for Duke**
 - <https://online.duke.edu/coursera-for-duke/>
- **Java Programming/Soft Eng Fund**
 - 5 courses
 - HTML/CSS/JavaScript
 - 4 courses on Java
- **Course is FREE for Duke students**
 - Go through link above
