

COMPSCI 101

-> why should you take it?

Worth learning

In such a technological world, learning a little bit of code feels like a must! This class made me feel more at home working with software and tech, which is something most of us will have to do to some extent.

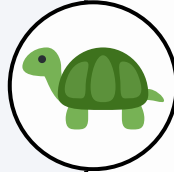

01

Fun assignments

Coding assignments are fun, like drawing cool shapes (you give your turtle a name and then give him a pen! so cute!) and making games to play with the computer.

02

Friends!

From lab work to WOTOs to late-night coding sessions, there are lots of chances to get to know & work with others in the class!

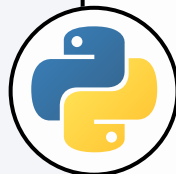

03

Makes you think :)

Learning to code in Python felt a little like learning a new language for me! At first, it can be confusing, but towards the end of the semester, it comes easily, which is super rewarding!

04

Not too hard!

If you turn things in and stay on top of the work, the class is very fair! Assignments prepare you well for exams, and the expectations are clear.

05

Sign up! You won't regret it :)
