

Happy ending :

Opening my laptop,

Logging into canvas.

A routine like no other,

Course webpage is my destination.

I scroll down and finally see it,

APT 7, the final one, a bittersweet ending.

I am starting now and yet I do not want to.

Not because I don't like it,

But because it's the last time I will be able to.

I write the code, the Seven steps in mind.

Some pass, some fail, I start anew.

As the time goes by, I finally feel it.

Most pass, few fail, I finally see it.

All pass and I see green.

I'm done.

And I can finally say it,

Good bye Compsi 101.
