

In CompSci 101 we took the leap,
From loops to lists, no time for sleep.
With ifs and elses, bugs galore,
We hit "run" once, then debugged some more.

From Python snakes to logic tight,
We learned to code deep into night.
Print statements cheered us through each test,
Organization made us code our best.

Now functions flow and programs gleam,
Recursion and logic—what a dream!
Though errors came, we didn't stress,
In CompSci 101, we prevailed with success.
